ADVANCED DUNGEONS AND DRAGONS 1ST EDITON – CHARACTER CREATION

(adopts the Player's Handbook, select Unearthed Arcana entries, and house-rules)

The following guide compiles entries from the Player's Handbook, select Unearthed Arcana entries, and information from the Dungeon Master's Guide needed to create a character.

House rules are incorporated in terms of weapons, level limits, and class options for demi-humans. If more details are required, or if there are any contradictions for any feature or step, consult either the Player's Handbook or the Dungeon Master (DM) for clarification.

Psionics Appendix 26

1. Generate Ability Scores (See Ability Score Appendix) by one of the following methods:

a. **Method I**: Roll 4d6 and drop the lowest die six times and arrange however you prefer.

b. **Method II**: Roll 3d6 twelve times, keep the highest six scores, and arrange as above.

c. **Method III**: Roll 3d6 for each ability score six times, and keep the highest score for each ability.

d. **Method IV**: Roll 3d6 for each ability score, in order, for 12 characters. Select one set.

Note: If you have less than two 15s or higher in your array, roll your set of stats again until you have an array with at least two 15s or higher.

(Optional) If your character has one or more scores of 16 or higher in intelligence, wisdom, or charisma, they may have psionic capability. Work with the DM to determine the rest. See Psionics Appendix at the end.

2. Select a Race (See Race Appendix)

a. Review the racial abilities, proficiencies, and class restrictions in the PHB and select a race, noting the maximum and minimum stats per the table below:

c. If any ability scores are above or below the minimum and maximum for your chosen character race, truncate the applicable scores so they fall within the allowed range.

d. Note additional characteristics such as hearing:

3. Select a Class (See Class Appendix)

a. Review each class ability score minimum using the table below, and select a class.

i. If you are a demi-human, you may elect to multi-class per the table below if you meet the class minimums for each class desired.

ii. If you are a demi-human and choose to only one class, your class level maximum is raised two levels. (i.e. an Elf Fighter/Magic-User with strength 17 is normally limited to level 6 Fighter, however if the Elf is simply a Fighter, their maximum achievable level is 8.)

iii. If you are a human, inform the DM if you would like to dual-class or become a bard (half-elf, halfling applicable). The DM will have the detailed procedures for dual-classing available for character planning.

Class Ability Minimums	Cleric	Druid	Fighter	Paladin	Ranger	Magic-User	Illusionist	Thief	Assassin	Bard

Ranger Tenets:

- Changing to a non-good alignment immediately removes ranger powers and becomes a fighter with d8 hit die.
- No hirelings or henchmen until 8th level
- No more than 3 rangers in a party
- Only carry goods and treasure which they can carry on their person or their mount. Excess donated to a worthy communal or institutional cause (never another player character).

PSIONICS APPENDIX

1. Determine Psionic capability by rolling 1d100. A score of 00 (100%) or greater always indicates psionic capability:
    a. For every 1 point of intelligence above 16, add 2.5 to the dice roll.
    b. For every 1 point of wisdom above 16, add 1.5 to the dice roll.
    c. For every 1 point of charisma above 16, add 0.5 to the dice roll.
    d. Drop all fractions due to additions to the dice above.

Example: A fighter character has intelligence of 17, wisdom of 13, and charisma of 18. Adding bonuses due to high intelligence and charisma provides the following: 2.5 + 1 = 3.5 which is turned to 3 (dropping fractions). A d100 is rolled and a score of 97 or greater will indicate psionic capability.

2. Roll a d100 to determine the psionic strength. Psionic strength doubled is the total psionic ability which can never change. Psionic defense is equal to psionic strength.
    a. Add 1 bonus point to the d100 result for every point of intelligence, wisdom, and charisma above 12.
    b. If two of the three abilities are above 16, the number of bonus points are doubled.
    c. If all three abilities are above 16, the number of bonus points are quadrupled.

Example: The same fighter character above rolls a d100 and gets 95. Based on their intelligence, they add 5 points (17-12), wisdom 1 point (13-12), and charisma 6 points (18-12) for a total of 12 bonus points. Because both intelligence and charisma are above 16, the number of bonus points double to 24. Adding 95 to 24 results in a psionic strength of 119, a psionic defense of 119, and a total psionic ability of 238.

3. Determine the number and choose the psionic attack modes the character possesses:

1d100	Number of Attack Modes
01-25	1 attack mode
26-50	2 attack modes
51-75	3 attack modes
76-95	4 attack modes
96-00	5 attack modes

Attack Mode	Point Cost per Use	Attack Range Short	Medium	Long
Psionic Blast	20	20′	40′	60′
Mind Thrust	4	30′	60′	90′
Ego Whip	7	40′	80′	120′
Id Insinuation	10	60′	120′	180′
Psychic Crush	14	50′	-	-

Example: The fighter character rolls a d100 and gets a result of 90. They are able to know four attack modes. They select Psionic Blast, Mind Thrust, Ego Whip, and Psychic Crush. These are the only attacks this character will ever know under normal circumstances.

4. Determine the number and choose the psionic defense modes the character possesses:

1d100	Number of Defense Modes
01-25	2 defense modes
26-75	3 defense modes
76-90	4 defense modes
91-00	5 defense modes

Defense Mode	Point Cost per Use	Area Protected
Mind Blank*	1	Individual Only
Thought Shield	2	Individual Only
Mental Barrier	3	Individual Only
Intellect Fortress	8	10′ radius of individual
Tower of Iron Will	10	3′ radius of individual

*Mind Blank is required of all psionic characters.

Example: The fighter character rolls a d100 and gets a result of 43. They are able to know three defense modes. The first defense mode chosen is Mind Blank since it is required. The next two defense modes they choose are Mental Barrier and Intellect Fortress. These are the only defense modes this character will ever know under normal circumstances.

5. Determine the number and types of psionic disciplines the character will gain access to throughout their adventuring.
    a. The character starts with one minor devotion upon character creation, the remaining disciplines are gained every two levels afterwards (i.e. level 3, 5, 7, etc.)
    b. If a major science is rolled, it cannot be learned until after all minor devotions are learned first.

	Number of Disciplines	
1d100	Minor (Devotions)	Major (Sciences)
01-10	1	0
11-25	2	0
26-40	3	0
41-55	2	1
56-70	3	1
71-80	4	1
81-90	3	2
91-95	5	1
96-00	4	2

	Minor (Devotions) (1d12, 1d6) *	Major (Sciences) (1d20)
1	Animal Telepathy	Astral Projection
2	Body Equilibrium	Aura Alteration
3	Body Weaponry (no magic-users**)	Body Control
4	Cell Adjustment	Dimension Door
5	Clairaudience	Dimension Walk
6	Clairvoyance	Energy Control
7	Detection of Good and Evil	Etherealness
8	Detection of Magic	Mass Domination (no thieves**)
9	Domination (no thieves**)	Mind Bar
10	Empathy (no fighters**)	Molecular Manipulation
11	ESP	Molecular Rearrangement
12	Expansion (no clerics**)	Probability Travel
13	Hypnosis	Telekinesis
14	Invisibility	Telempathetic Projection (no fighters**)
15	Levitation	Telepathy
16	Mind Over Body	Telepathic Projection
17	Molecular Agitation	Teleportation
18	Object reading (no thieves**)	Shape Alteration
19	Precognition	Roll again (or select one)
20	Reduction (no clerics)	Roll again (or get two minor devotions)
21	Sensitivity to Psychic Impressions	
22	Suspend Animation	
23	Roll again (or select one)	
24	Roll again (or select one)	

* Roll 1d12 then roll 1d6. d6 – 1 – 3 = keep 1d12 roll, 4 – 6 = double 1d12 roll

** magic-user includes illusionists, thieves include assassins, fighters include paladins, rangers, and bards, and clerics include druids

Example: The fighter character rolls 1d100 and gets 50. They can know 2 minor devotions and 1 major science. Rolling on the following table, the character gets 16 and 7 on the minor devotions (Mind Over Body and Detection of Good and Evil) and 15 on the major science (Telepathy). The fighter selects Mind Over Body to know immediately. He will learn Detection of Good and Evil at level 3, and Telepathy (major science) at level 5.
